The Sales Prospectus with integrated management regulations, the Key Investor Documents (KID) and the fund's annual and semi-annual reports are available free of charge by post, fax or E-mail from the registered office of the management company and from the custodian bank, paying agents and the distributor in the respective countries of distribution. Additional information is available from the management company at all times during regular business hours.

Unit subscriptions are valid only if they are made on the basis of the most recent version of the Sales Prospectus (including its annexes) in conjunction with the latest available annual report and any subsequent semi-annual report.

The information and figures contained in this report relate to past performance only and give no indication of future performance.

FUND MANAGEMENT REPORT

The fund management report on behalf of the Board of Directors of the management company:

"Within our mandate, the ECB is ready to do whatever it takes to preserve the euro. And believe me, it will be enough." (Mario Draghi – President of the European Central Bank on 26 July 2012)¹

2012 was a year of contrasts. Although the first six months were characterised by a high degree of volatility and uncertainty on the capital markets, the picture changed during the second half of the year. Even ardent pessimists were forced to rethink their fundamental stance – although the themes of growth and sovereign debt were (and continue to be) omnipresent on both sides of the Atlantic.

The ECB's intervention at the start of the year – in the form of more than EUR 1,000 billion in support for banks that should themselves have been coming to the aid of their flagging governments – provided only short-term relief for the markets. Worries about Greece (before and after the debt haircut), the reform process in the other "crisis-hit countries", the sustainability of the boost to liquidity, growth prospects in Europe, the US, but also, most importantly, China – where economic growth was expected to fall suddenly to "only" a sub- 8% level – were just too big to go away. Any confidence regarding the future of the euro was also undermined by sceptical comments from politicians and economists alike.

Even the Euro 2012 football championship failed to deflect from Europe's problems, in particular those afflicting Spain – once again crowned European champions and simultaneously the euro zone's fourth largest economy. Thus the Spanish jobless rate went on climbing to more than 25%, with Spanish government bond yields rising in tandem. At more than 7.5%, 10-year issues reached a level not seen since the launch of the single currency.

The Eurosceptics then faced disappointment at the end of July. The mood on the markets changed when the ECB announced it would do all in its power to defend the euro. Having been trading at 1.20, the euro then gradually climbed back to 1.30 against the dollar. At the same time, interest rates for Spanish 10-year bonds fell to a little above 5%. Having continued to be plagued by volatility at the start of the year, there was only one direction in which equities could go – in part underscored by forecasts that China would now see a return to 8%-plus growth in 2013. The S&P 500 and DAX indices, for instance, reached levels last seen in January 2008. The impending "fiscal cliff" in the US also failed to halt the trend, in part because even dyed-in-the-wool pessimists probably thought a compromise would be reached in good time and that the US economy would continue growing in 2013.

Although still positioned on a conservative, risk-averse footing at the start of the year, we began the second half intending to bring the fund into line with the changed environment – in accordance with our aim of delivering constant growth in the assets that you have entrusted to us. Besides increased equity quotas and changes in the currency allocation, the refocusing was also felt on the bond side through our exploitation of opportunities offering higher interest rates. Despite a difficult market environment in which setbacks were par for the course, we achieved new all-time highs for the funds thanks to a disciplined, risk-conscious approach amid low volatility.

We would like to take this opportunity to express our gratitude for the trust you have placed in us and are confident that – in accordance with our investment philosophy of "Constantia Divitarum" – we can continue to deliver the same degree of success in 2013 too.

Luxembourg, January 2013

NOTES TO THE ANNUAL REPORT AS AT 31 DECEMBER 2012

1.) **GENERAL**

The Ethna-GLOBAL Dynamisch investment fund is managed by ETHENEA Independent Investors S.A. pursuant to the fund's management regulations. The management regulations first came into force on 9 September 2008.

They were filed with the Luxembourg Trade and Companies Register with a reference to this filing published in Mémorial, Recueil des Sociétés et Associations, Official Gazette of the Grand Duchy of Luxembourg ("Mémorial"), on 31 October 2008. The management regulations were last amended on 27 December 2012, and a reference to this filing with the Trade and Companies Register in Luxembourg was published in the Mémorial on 18 January 2013.

The Ethna-GLOBAL Dynamisch fund is a Luxembourg investment fund (fonds commun de placement), which was set up in the form of a mono fund for an indefinite period in accordance with Part I of the Luxembourg law of 17 December 2010 on Undertakings for Collective Investment (hereinafter "the law of 17 December 2010").

The management company of the Fund is ETHENEA Independent Investors S.A. ("management company"), a public limited liability company incorporated under the laws of the Grand Duchy of Luxembourg with its registered office at 9a, Rue Gabriel Lippmann, L-5365 Munsbach. The company was founded on 10 September 2010 for an indefinite period. Its Articles of Association were published on 15 September 2010 in the Mémorial. Amendments to the management company's Articles of Association entered into force on 1 October 2011 and were published in the Mémorial on 21 October 2011. The management company is registered with the Luxembourg Trade and Companies Register under the registration number R.C.S. Luxemburg B-155427.

2.) KEY ACCOUNTING AND VALUATION PRINCIPLES

These annual financial statements were prepared under the responsibility of the Board of Directors of the management company in accordance with the statutory provisions and regulations on the preparation and presentation of annual financial statements applicable in Luxembourg.

- 1. The fund's net assets are stated in euros (EUR) ("reference currency").
- 2. The value of a fund unit ("unit value") is stated in the currency ("fund currency") as specified in the annex to the Sales Prospectus unless a currency other than the fund currency is specified for any other unit classes in the annex to the Prospectus ("unit class currency").
- 3. The unit value is calculated by the management company or by an agent commissioned by it under the supervision of the custodian bank on any banking day in Luxembourg with the exception of 24 and 31 December of each year ("valuation day"). However, the management company may decide to determine the unit value on 24 and 31 December of any given year without reference to a calculation of the unit value on a valuation day as specified in sentence 1 above of this point 3. As a consequence, investors shall not be entitled to demand the issue, redemption and/or exchange of units on the basis of a unit value calculated on 24 and/or 31 December in any year.
- 4. To calculate the unit value, the value of the assets in the fund less any fund liabilities ("net fund assets") is calculated on each valuation day, divided by the number of fund units in circulation on the valuation day and rounded to two decimal places.

- 5. To the extent that information regarding the position of the fund assets as a whole needs to be provided in annual reports, semi-annual reports or other financial statistics in accordance with legal requirements or the rules in the fund management regulations, the fund assets are translated into the reference currency. Net fund assets are calculated in accordance with the following principles:
 - a) Securities listed on a stock exchange are valued using the latest available price. If a security is officially listed on several stock exchanges, the relevant price is the latest available price on the stock exchange representing the principal market for this security.
 - b) Securities not officially listed on a stock exchange but traded on a regulated market are valued at a price that may be no lower than the bid price and no higher than the offer price at the time of the valuation and that the management company considers to be the best possible price at which the securities may be sold.
 - c) OTC derivatives are valued on a daily basis using a verifiable method to be specified by the management company.
 - d) UCITS or UCIs are valued at the latest determined and available redemption price. If redemption has been suspended for investment fund units or a redemption price has not been specified, these units are valued in the same way as all other assets at the relevant market value as determined by the management company in good faith using generally accepted and verifiable valuation rules.

- e) If prices are not in line with the market and if no prices have been specified for securities other than those under a) and b), these securities and any of the other legally permissible assets are valued at the relevant market value as determined by the management company in good faith on the basis of the selling price that is likely to be achieved.
- f) Liquid assets are valued at face value plus interest.
- g) The market value of securities and other investments denominated in a currency other than the fund currency is converted into the relevant fund currency at the most recent exchange mid rate. Gains and losses on foreign exchange transactions will be added or deducted as appropriate.

Net fund assets are reduced by any distributions paid to investors in the fund.

- 6. The unit value is calculated in accordance with the aforementioned criteria. However, if unit classes have been created within the fund, the unit value is calculated in accordance with the aforementioned criteria separately for each unit class.
- 7. For the purpose of uniformity in the tax information for German investors pursuant to section 5 (1) of the German Investment Tax Act (Investmentsteuergesetz InvStG) and of the information required by investment legislation, cumulative reinvested income over the time an investment is held and realised interim gains from target funds which are sold during the financial year are shown under ordinary income as income from investment fund units. In the event of negative interim gains, negative income from investment fund units may be shown under ordinary income.

For accounting reasons, the tables published in this report may contain rounding discrepancies of +/ - one unit (currency, percent, etc.).

3.) TAXATION

Taxation of the fund

The fund assets are subject to a tax in the Grand Duchy of Luxembourg, the so-called "taxe d'abonnement", payable quarterly at the current rate of 0.05% p.a. of the net fund assets as reported at the end of the relevant quarter. The rate of the taxe d'abonnement for the fund or unit classes is mentioned in the annex to the Sales Prospectus. If the fund assets are invested in other Luxembourg investment funds that are already subject to the taxe d'abonnement, the tax is waived for the portion of the fund assets invested in those Luxembourg investment funds. The fund's income from the investment of fund assets is not taxed in the Grand Duchy of Luxembourg. However, this income may be subject to withholding tax in the countries in which the fund assets are invested. In such cases, neither the custodian bank nor the management company is required to collect tax certificates.

Taxation on income from investment fund units for the investor

Implementing Directive 2003/48/EC on the taxation of interest income ("Directive"), the Grand Duchy of Luxembourg has levied a withholding tax since 1 July 2005. This withholding tax applies to certain interest income paid in Luxembourg to natural persons that are tax residents in another member state. Under certain conditions, this withholding tax may also apply to the interest income of an investment fund. By adopting the Directive, the EU member states agreed that all interest payments should be taxed in accordance with the regulations of the country of residence. To that end, an automatic exchange of information was agreed among the national tax authorities. An exception was agreed to the effect that Luxembourg would not participate for a transitional period in the automatic exchange of information agreed by the other states. Instead, a withholding tax on interest income was introduced in Luxembourg. This withholding tax has amounted to 35% of the interest payment since 1 July 2011. It is transferred anonymously to the Luxembourg tax authorities and the investor is issued a certificate in this regard. With this certificate, the withholding tax paid is fully deductible from the taxpayer's tax liability in his country of residence. By granting power of attorney to allow voluntary participation in the exchange of information between tax authorities or by submitting a "certificate to enable exemption from the deduction of withholding tax" issued by the tax authorities in the country of residence, the deduction of withholding tax can be avoided.

Prospective investors should ensure they are informed about laws and regulations which apply to the purchase, ownership and redemption of units and obtain advice if necessary.

Information for investors liable for tax in Germany:

The bases for taxation pursuant to section 5 (1) of the German Tax Act (Investmentsteuergesetz – InvStG) are made available in the German Federal Gazette www.bundesanzeiger.de under "Kapitalmarkt – Besteuerungsgrundlagen" within the publication timeframe required by law.

4.) USE OF INCOME

20

Income from unit class A is distributed. Income from unit class T is reinvested. Distribution takes place at the intervals determined from time to time by the management company. Further details on the use of income are provided in the Sales Prospectus.

5.) INFORMATION ON FEES AND EXPENSE

Information on management and custodian fees and charges may be found in the current Sales Prospectus.

6.) TRANSACTION COSTS

Transaction costs include all costs which were accounted for / settled separately on account of the fund in the financial year and are directly connected with a purchase or sale of assets.

7.) TOTAL EXPENSE RATIO (TER)

In calculating the total expense ratio (TER), the following BVI calculation method was applied:

Total cost in fund currency

TER = -----*100

Average fund volume (basis: NFA calculated daily *)

* NFA = net fund assets

The TER indicates the level of expenses charged to the fund assets. They cover management and custodian fees and the "taxe d'abonnement" as well as all other costs, with the exception of the transaction costs incurred by the fund. It shows the total amount of these costs as a percentage of the average fund volume in a financial year. (Any performance fees are shown separately in direct relation to the TER.)

8.) ONGOING CHARGES

"Ongoing charges" is a figure calculated pursuant to Article 10 (2) (b) of Commission Regulation (EU) No. 583/2010 of 1 July 2010 implementing Directive 2009/65/EC of the European Parliament.

The ongoing charges indicate the level of expenses charged to the fund assets in the past financial year. They cover management and custodian fees and the "taxe d'abonnement" as well as all other costs, with the exception of any performance fees incurred by the fund. The figure shows the total amount of these charges as a percentage of the average fund volume in the financial year. In the case of investment funds which invest more than 20% of their assets in other fund products / target funds, the charges for the target funds are also included – any retrocession receipts (trailer fees) for these products are offset against the charges.

In the case of unit classes that have not yet existed for a full financial year, the figure is based on an estimate of the charges.

9.) INCOME EQUALISATION

An income equalisation amount and expense equalisation amount are set against ordinary income and expense. This covers net income arising during the period under review which the purchaser of units pays for as part of the issue price and the seller of units receives as part of the redemption price.

10.) RISK MANAGEMENT

The management company applies a risk management procedure which enables it to monitor and measure at all times the risk contained in the investment positions and their contribution to the overall risk profile of the investment portfolio of the funds managed by the management company. In accordance with the Law of 17 December 2010 and the applicable supervisory requirements of the Commission de Surveillance du Secteur Financier ("CSSF"), the management company reports regularly to the CSSF on the risk management procedure it applies. As part of its risk management procedure, the management company ensures, through the use of effective and appropriate methods, that the overall risk connected with derivatives in the funds managed does not exceed the total net value of their portfolios. To do this, the management company uses the following methods:

Commitment Approach:

Under the Commitment Approach, positions in derivative financial instruments are converted into their underlying equivalent using the delta method. This takes account of netting and hedging effects between derivative financial instruments and their underlyings. The total for their underlying equivalents must not exceed the net asset value of the fund.

VaR Approach:

The Value-at-Risk (VaR) figure is a statistical concept and is used as a standard measure of risk in the financial sector. The VaR indicates the potential loss on a portfolio during a given period (the holding period) which has a given probability (the confidence level) of not being exceeded.

21

Relative VaR Approach:

In the relative VaR Approach, the VaR for the fund must not exceed twice the value of the VaR for a benchmark portfolio. The benchmark portfolio provides a correct representation of the fund's investment policy.

Absolute VaR Approach:

In the absolute VaR Approach, the VaR for the fund (99% confidence level, 20-day holding period) must not exceed 20% of the fund assets.

For funds which use the VaR approaches to ascertain the total risk associated with derivatives, the management company estimates the expected average value for the leverage effect. The extent of this leverage effect is published in the Prospectus and may deviate from and fall below or exceed the actual value depending on prevailing market conditions. Investors' attention is drawn to the fact that no conclusions can be drawn from this information with respect to the risk entailed in the fund. Furthermore, the expected leverage published is explicitly not to be understood as an investment limit.

In accordance with the Sales Prospectus valid at the end of the financial year, Ethna-Global Dynamic is subject to the following risk management procedure:

Absolute VaR

UCITS

Risk management procedure applied

Ethna-GLOBAL Dynamisch

Absolute VaR Approach for Ethna-GLOBAL Dynamisch

In the period from 1 January 2012 to 31 December 2012, the absolute VaR Approach was used to monitor and measure the total risk associated with derivatives. An absolute value of 15% was used for the internal limit. The VaR figure in relation to this internal limit was a minimum of 11.19%, a maximum of 56.98% and an average of 33.96% over the period in question. The VaR was calculated using a (parametric) variance-covariance approach, applying the calculation standard of a one-sided confidence interval of 99%, a holding period of 20 days and a (historical) observation period of 252 trading days.

In the period from 1 January 2012 to 31 December 2012, the leverage effect had the following values:

| Lowest leverage: | 0.00% |
|---------------------|---|
| Highest leverage: | 54.69% |
| Median leverage: | 19.62% (20.90%) |
| Calculation method: | Nominal value method (total of nominal values of all derivatives) |

REPORT OF THE RÉVISEUR D'ENTREPRISES AGRÉÉ

22

To the unitholders of Ethna-GLOBAL Dynamisch 9a, Rue Gabriel Lippmann L-5365 Munsbach

We have audited the accompanying annual financial statements of Ethna-GLOBAL Dynamisch, consisting of the statement of net assets including securities holdings and other assets as at 31 December 2012, the statement of operations and changes to net fund assets for the financial year ending on this date and a summary of key accounting methods and other explanatory notes.

Responsibility of the Board of Directors for the annual financial statements

The Board of Directors of the management company is responsible for the preparation and fair presentation of the annual financial statements in accordance with the legal provisions and regulations applying in Luxembourg to the preparation of annual financial statements, and for the internal controls which it deems necessary in order to ensure that annual financial statements are prepared which are free of material misstatement, whether due to error or fraud.

Responsibility of the Réviseur d'Entreprises agréé

It is our responsibility to express an opinion on these annual financial statements on the basis of our audit. We have carried out our audit in accordance with the International Standards on Auditing accepted for Luxembourg by the Commission de Surveillance du Secteur Financier. These standards require that we comply with professional standards of conduct and that we plan and execute the audit to obtain reasonable assurance that the annual financial statements are free of material misstatement.

An audit involves carrying out audit procedures to obtain audit evidence for the values and information contained in the annual financial statements. The selection of audit procedures is a matter for the judgement of the Réviseur d'Entreprises agréé, as is the evaluation of the risk that the annual financial statements may contain material misstatement due to error or fraud. As part of this risk assessment, the Réviseur d'Entreprises agréé takes into account the internal control system established for the purpose of the preparation and fair presentation of the annual financial statements in order to establish the audit procedures appropriate to the circumstances; however, the purpose is not to give an assessment of the effectiveness of the internal control system.

An audit also includes an assessment of the suitability of the accounting principles and methods applied and of the reasonableness of the accounting estimates made by the Board of Directors of the management company, as well as an assessment of the overall presentation of the annual financial statements.

We believe that the audit evidence we have obtained is suitable and sufficient to serve as a basis for our audit opinion.

Audit opinion

In our opinion, the annual financial statements give a true and fair view of the financial position of Ethna-GLOBAL Dynamisch as at 31 December 2012 and of its earnings position and change in net fund assets for the financial year ending on this date, in accordance with the legal provisions and regulations applying in Luxembourg to the preparation of annual financial statements.

Other

The supplementary information contained in the annual report was examined in the context of our mandate, but was not subject to specific audit procedures in accordance with the above standards. Therefore, our audit opinion does not refer to this information. Within the context of the overall presentation of the annual financial statements, this information gave us no cause to comment.
